

10 ways to limit climate change

- Undertake a DIY warmth check of your house
- Stop drafts by fitting draft excluders to doors and windows
- Adjust thermostatic radiator valve settings to room occupancy
-
- Consider topping up loft insulation if less than 300 mm thick
- Buy less stuff and upcycle items so they can be reused for other purposes
- Buy locally sourced food and consider growing your own
-
- Walking or cycling to school
- Have one more meat or dairy free meal each week
- Consider working from home one or more days per week
- Consider installing solar electric modules if your roof is orientated SE to SW
-
